Q1:
```
mm <- read_tsv("MLLT3_small.vcf",comment="##")
```
or
```
mm <- read_tsv("MLLT3_small.vcf",skip=255)
```

If students included the file's directory, that is fine.

Q2:
```
mm <- read_tsv("MLLT3_small.vcf",comment="##",
 col_types= cols(
 FILTER = col_factor(),
 FORMAT = col_factor()))
```
